

ToriCal TCF604 - Fluorescent Yellow Gloss

TORICAL™ TCF604 Fluorescent Yellow Gloss is a high-visibility calendered vinyl designed to deliver maximum visual impact for graphics, signage, vehicle liveries and applications where getting noticed really matters.

Featuring a vibrant fluorescent yellow gloss finish, TCF604 creates an eye-catching, high-energy appearance that stands out from standard colours, making it ideal for safety markings, commercial vehicles, promotional graphics, fleet identification, motorsport and high-visibility applications. The film incorporates the advanced ToriAir™ air-release adhesive system, helping installers achieve a smoother, faster and more controlled application. The structured adhesive allows trapped air to escape during application, helping to minimise bubbles and reducing installation time while delivering a clean, professional finish.

TCF604 combines the practical benefits of a professional calendered film with the stand-out appearance of fluorescent colour, making it an ideal choice for sign makers and vehicle graphic specialists looking for impact, productivity and value.
