

Swiss Precision In Every Layer

Torian® Swiss Design. Globally Respected.

Our Story

The Story of Torian® – Swiss Precision in Every Layer. Born in the heart of the Swiss Alps, TORIAN Precision Films Group was founded in 2021 with a single vision: to redefine the standard of vehicle protection and visual expression through uncompromising precision and innovation.

The Founders:

Passionate about automotive culture and Swiss craftsmanship and influenced by aerospace polymers and high-performance coatings, they saw a gap in the market: no other brand was offering ultra-premium car wraps and paint protection films that combined technical excellence with refined aesthetics.

Automotive Inspiration:

Drawing inspiration from the meticulous standards of Swiss watchmaking and the sleek performance of European supercars, TORIAN® began developing its own line of paint protection films (PPF) and high-performance coloured wrap vinyl.

Swiss Design. Globally Respected.

Every PPF material is engineered in Switzerland, using proprietary polymer blends designed to deliver self-healing TPU technology (PPF), UV resistance tailored for alpine to desert climates, unrivalled conformability for complex curves and a finish so smooth, it rivals paint. In just a few short years, TORIAN® has grown from a boutique development lab, into a respected name across the continent, trusted by elite wrap studios, motorsport teams, and vehicle collectors alike.

ToriShield

Paint Protection Film PPF

The Torian ToriShield™ PPF Series is engineered for ultimate protection, versatility, and premium aesthetics, offering tailored solutions for professional installers and demanding applications.

Features:

The ToriShield™ PPF range is wet-apply, paint-like in appearance, and designed to protect without compromise, giving installers and customers a superior choice for vehicle protection and styling.

Benefits:

Wet application method.
High-end restyling projects requiring both aesthetics and durability.
Fleet and special edition models with unique colour branding.
Replacement for traditional paint processes in custom builds.

Technical:

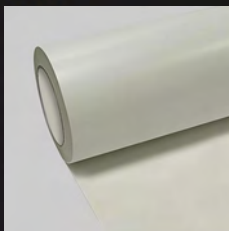

Film: Thermoplastic Polyurethane (TPU).
Thickness: 180 micron (7.5mil).
Top Coat: Self-healing, hydrophobic.
Adhesive: Clear pressure sensitive solvent acrylic-based adhesive.

ScreenShield

Windscreen Protection Film

Torian® ScreenShield™ is a next-generation thermoplastic polyurethane (TPU) protection film developed to safeguard windscreens and visors in motorsport and high-performance environments.

TSS100

ScreenShield Clear

Features:

Designed for endurance, clarity, and precision, ScreenShield™ delivers outstanding impact resistance against debris, stones, and track abrasion, while maintaining exceptional optical quality and driver visibility.

Benefits:

High-Impact TPU Construction, engineered to absorb and disperse impact energy from gravel, debris, and track fragments, protecting glass from cracking and pitting.

Ultra-Clear Optical Transparency, ensures distortion-free visibility for drivers, even in high-speed or low-light conditions.

Hydrophobic Surface Coating, repels water, dust, and dirt, improving visibility in wet conditions and reducing maintenance.

Self-Healing Topcoat, surface micro-repairs minor scratches and abrasions with the application of gentle heat or sunlight.

UV and Chemical Resistance, provides long-term protection from yellowing, UV degradation, and cleaning products.

Technical:

Film: Thermoplastic Polyurethane (TPU).

Thickness: 180 microns (7.5 mil).

Top Coat: : Self-healing, hydrophobic.

Adhesive: Clear pressure sensitive solvent acrylic-based adhesive.

LightShield

Light Protection Film

The Torian LightShield™ Series is a premium range of thermoplastic polyurethane (TPU) headlight protection films designed to provide both functional protection and cosmetic modern automotive lighting.

TLS001
Photochromic LPF

TLS002
Light Grey LPF

TLS003
Light Black LPF

TLS004
Smoked Black LPF

Features:

Combining advanced impact resistance with stylish optical tint finishes, LightShield™ delivers the perfect balance of durability, clarity, and design, ideal for custom black packs and motorsport aesthetics.

Benefits:

Enhances vehicle aesthetics with a choice of stylish tint levels.
Provides protection from impact damage, extending the life of expensive headlight units.
Allows easy personalisation without permanent modification.
Ideal for motorsport, black pack, and premium vehicle styling applications.
Maintains optical clarity and beam performance in all lighting conditions.

Technical:

Film: Thermoplastic Polyurethane (TPU).
Thickness: 130 microns (5.12 mil).
Top Coat: Self-healing, hydrophobic.
Adhesive: Clear pressure sensitive solvent acrylic-based adhesive.

ColourShield™

Wet Apply Coloured PPF

Torian® ColourShield™ is an advanced wet-apply, coloured TPU based paint protection film (PPF) engineered to deliver the deep gloss and flawless finish of freshly painted bodywork while providing exceptional protection against everyday damage.

Features:

Developed with cutting-edge polyurethane technology, ColourShield™ combines ultra-high transparency in its gloss topcoat with intense, uniform automotive grade colour pigmentation throughout the film. This ensures a paint-like aesthetic without the need for resprays and with the added benefit of long-term surface protection.

Benefits:

Wet application method.
Full vehicle colour-change with integrated paint protection.
Can be used for high-end restyling projects requiring both aesthetics and durability.
Fleet and special edition models with unique colour branding.
Replacement for traditional paint processes in custom builds.

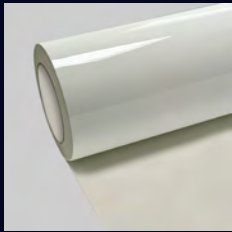

Technical:

Film: Thermoplastic Polyurethane (TPU).
Thickness: 180–210 microns (7.5–8.3 mil) depending on colour.
Top Coat: Self-healing, hydrophobic
Adhesive: Clear pressure sensitive solvent acrylic-based adhesive.

SpectraShield

Dry Apply Coloured PPF

Torian® SpectraShield™ is an advanced dry-apply, coloured TPU based paint protection film (PPF) engineered to deliver the deep gloss, frozen satin, special effects with a flawless finish of freshly painted bodywork while providing exceptional protection against everyday damage.

Features:

Developed with cutting-edge polyurethane technology, SpectraShield™ combines ultra-high transparency in its topcoats with intense, uniform colour automotive grade pigmentation throughout the film. This ensures a paint-like aesthetic without the need for resprays and with the added benefit of long-term surface protection.

Benefits:

- Dry application method.
- Full vehicle colour-change with integrated paint protection.
- Can be used for high-end restyling projects requiring both aesthetics and durability.
- Fleet and special edition models with unique colour branding.
- Replacement for traditional paint processes in custom builds.

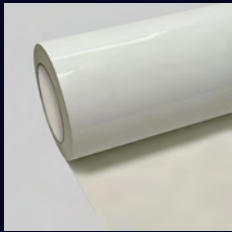

Technical:

SuperGloss

Coloured Vehicle Wrap

Torian® SuperGloss™ PET Wrapping Vinyl is a next-generation PVC wrap film engineered to deliver a flawless paint-like finish with extreme depth, clarity, and reflection. Built on an advanced PET liner system, SuperGloss ensures a glass-smooth surface with minimal texture, creating an ultra-premium high-gloss appearance that rivals professional paintwork.

Features:

Designed for full and partial vehicle wraps, this film offers superb conformability, making it ideal for complex curves and deep recesses. Its durable hybrid cast / calendered construction provides long-term stability, resistance to UV fading, and excellent outdoor performance, while the repositionable adhesive system ensures clean application and removal. With unmatched gloss levels, superior durability, and a prestige finish, Torian SuperGloss™ PET is the ultimate choice for installers and customers who demand the very best in high-gloss automotive styling.

Benefits:

ToriStick™ dry apply adhesive system.
Full vehicle colour-change paint-like gloss finish.
Fleet and special edition models with unique colour branding.
Replacement for traditional paint processes in custom builds.

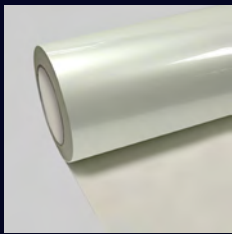

Technical:

Film: Conformable composite cast / calendered PolyVinylChloride (PVC).
Thickness: 100–200 microns depending on colour.
Top Coat: UltraGloss easy clean.
Adhesive: ToriStick™ clear pressure sensitive solvent acrylic-based adhesive.

SuperSuede

Alcantara Interior Wrap

Torian® SuperSuede™ is a premium self-adhesive microfiber suede interior wrap film with a luxurious, tactile Alcantara-style texture.

Features:

Specifically designed for interior customisation, this film combines aesthetic elegance with conformability and ease of application for a wide range of surfaces including dashboards, door panels, trims, consoles, and furniture.

Benefits:

Premium Alcantara-style finish – authentically replicates the look and feel of real suede/Alcantara. Flexible conformability – stretches and moulds to complex curves, contours, and interior detailing. Non-reflective matte texture – reduces glare, ideal for dashboards and cockpits. Removable without residue – designed for professional application and clean removal. Ideal for automotive, marine, and aviation interiors – versatile for multiple applications. Customisation flexibility – perfect for dashboards, door panels, centre consoles, headliners, and trims.

Technical:

Film: 92% Terylene (PET fibre) and 8% Polyurethane.

Thickness: $200\text{gr/m}^2 \pm 10\text{gr/m}^2$.

Top Coat: Matt finish suede soft touch

Adhesive: Two-component high-tack clean removable glue.
